Activity Description

Our kindergarten arranged an extracurricular learning experience at the "Hong Kong Children's Discovery Museum" for K2 students. Centered around the concept of "learning through play," the activity fosters children's development in language, S.T.E.A.M. (Science, Technology, Engineering, Arts, and Mathematics), and cultural awareness (such as traditional toys, shadow puppetry, and Chinese clothing) through interactive exploration. In addition to fostering independent learning, it also deepens children's understanding of traditional Chinese culture and promotes cultural heritage.
